MISSION STATEMENT

The American Society of Civil Engineers (ASCE) chapter of California State, Long Beach is devoted to the development and continued learning of civil engineering students. ASCE's mission is to provide essential value to our members, their careers, our partners, and the public by developing leadership, advancing technology, advocating lifelong learning, and promoting the profession. Our student chapter is continually informing and connecting graduates and students with full-time positions and internships in the civil engineering field.

ABOUT ASCE CSULB

Our student chapter is continually connecting students with full-time positions and internships in the civil engineering field through our annual career fair, resume workshops, and professional networking.

We also host various outreach events such as “Dream Big” to encourage young students to pursue a career in engineering. For fun, we organize social events with other civil engineering organizations and schools.
